A TALK ON TOBACCO. Some Seasonable Suggestions on

Curing It. To the Tobacco Farmers of Virginia:

We have had so much tobacco talk with We have had so much tobacco talk with you through our old, trusted, and mutual friend, the Dispatch, first, because we only take such liberites with those we love; second, because the Dispatch is the great firmers' organ of Virgina, and reaches perhaps more of you than any other paper; and, lastly, because our interest is a mutual one. We have suggested to you now much tobacco to plant, what kinds, how to grow, worm, succor, and ton it, and, as we approach the homewhat kinds, how to grow, worm succor, and top it; and, as we approach the homestretch, for it is August, when much will have to be cut—we say, please do not cut before it is ripe. This you can plainly tell by its gradual change in color. When it begins to grain it will then thange to a yellow cast, and the leaves become brittle. Before cutting see that all the suckers are pulled off, in order to give the leaves all the substance from the stalk to feed it during the curing process, etc. When cut, look well to its being bruised or broken. To this lat it be put on the sticks on the Now comes the rub: How to cure

it. We speak from our own standpoint, with an experience of fifty years (half a century). We advise sun-cure or are, it will not otherwise cure up uniformly. For manufactures, shippers, or stemm we profer dark red or brown, which us is the same color. It gives us plea-sure to say from all reports the outlook is a fairly good one for the future of fine tobacco, common grades, below of the tobacco, common grades being still a drug on the markets.

The Capitol-Square Walks.

To the Editor of the Dispatch: If the State of Virginia would make its walkways in the Capitol Square ways of greater pleasantness for the feet it would greater pleasantness for the feet it would eceive and would receive still more the gratitude and reverence to which it is entitled. The alleged gravel that is put on the walks referred to is generally not gravel at all, but the sharpest and flintlest of broken rock. It is distressing to tenderfoot and veteran tramp alike, and of shoe-leather is destructive. CITIZEN.

Something novel in the line of building material is produced at a mill in Christiana, Norway, This mill, says the Manufacturers' Gazette, Beston, began operations about two years ago, making roofing tiles, and is now shipping to different parts of the globe an article which is of acknowledged superiority in the way of "slates." Norway tiles, as they are termed, are made from wood pulp, which, under very high pressure, is formed into thin cakes of sizes like the ordinary roofing slates. After a chemical treatment, which is the inventor's secret, the tiles become hard like brick, and acquire a deep black appearance, which gives a soft tone to houses with prominent roofs and gables. It is cialmed for these tiles that they possess every advantage of the best slates now in use; their composition makes them light, durable, and not so liable to breakage its the ordinary slates; they are not subject to any expansion or contraction, and when a roof is once covered A collision between Car No. II, Richmond Traction Company, and a surrey containing a men and two women occurred at Jombardy and Broad streets shortly before if o'clock last night.

The Lord Chancellor. (Chambers's Journal)

The "titbit" of the administration from the anancial point of view is the Lord Chancellorship. The salary attached to the office is \$10,000-\$i,000 as Speaker of the House of Lords, and \$6,000 as Lord Chancellor. In point of precedence, it is also the highest office in the government. The Lord High Chancellor of Great Britain takes precedence of every other subject of the Queen, except the Royal Dukes and the Archbishop of Canterbury. The first Lord of the Treasury—who is awardly the head of the government. bury. The first Lord of the Treasury—who is usually the head of the government—so far from being in point of precedence the first in the Cabinet, is nearly half way down.
